CULS – FEM

Packet Tracer Activity 2 assignment – layers 1+2

1. Download source project from Moodle.
2. Part 1
   a. List MAC table on Switch0 and Switch1 (command *show mac-address-table*).
   b. Activate Traffic generator on PC0.
   c. Watch ICMP packets broadcasted on network.
   d. Repeat step 2a and compare results.
   e. *Note: No answer is submitted as result, activity is recorded in the file.*
3. Part 2
   a. Check the configuration of networks A, B a C.
   b. Find an error in configuration causing not all the PCs can communicate with all others.
   c. Fix the error by changing the configuration and/or connections or add/remove devices.
   d. *Note: There is more than one correct solution.*
4. Upload your submission to Moodle (your progress during work is recorded in the activity file and is also subject of evaluation).
